1. The disclosure should be carefully reviewed and ensure that any and all grammatical, idiomatic, and spelling or other minor errors are corrected.

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3. Claims 26-35 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 22-31 of copending Application No. 10/225,425. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

4. Claims 1-25 are allowable over prior art.

None of prior art of record taken alone or in combination shows a power holdup circuit for maintaining a voltage supplied by a power supply comprising a monitoring circuit, a power switching circuit including an energy storage device and a select circuit, and more detailed elements along with particular function(s) of each of those elements as recited in the claims of the instant application.
